Subject: Code from assignments

Dear Prof. Efros,

Last year I came across quad-edge library
here<http://www.cs.cmu.edu/afs/andrew/scs/cs/15-463/2001/pub/src/a2/quadedge.html>
(code
here <http://www.cs.cmu.edu/afs/andrew/scs/cs/15-463/2001/pub/src/a2/cell/>).
This code was given out to students as part of an assignment on this
course<http://www.cs.cmu.edu/afs/andrew/scs/cs/15-463/2001/pub/www/463.html>.
I inquired about licence of this code to Paul Heckbert <ph+@cs.cmu.edu> (email
address from his personal page <http://www.cs.cmu.edu/~ph/>). However, I
sent a question in August last year, and I still have not received any
response (I guess he does not use/check that address any more). But maybe
you know:

Under which licence is that code? And if there is no specific decision about
licencing that code, what is your institution's policy regarding such (or
similar) cases?

I would like to use this code, because I like its style (no needless
templates which complicate usage and debugging), if it is available under
suitable open-source licence.

Best regards,
DÅ¾enan

P.S. I you are interested about our group, you can get more info
